Assembly Tips - read before you start!

Find a partner.

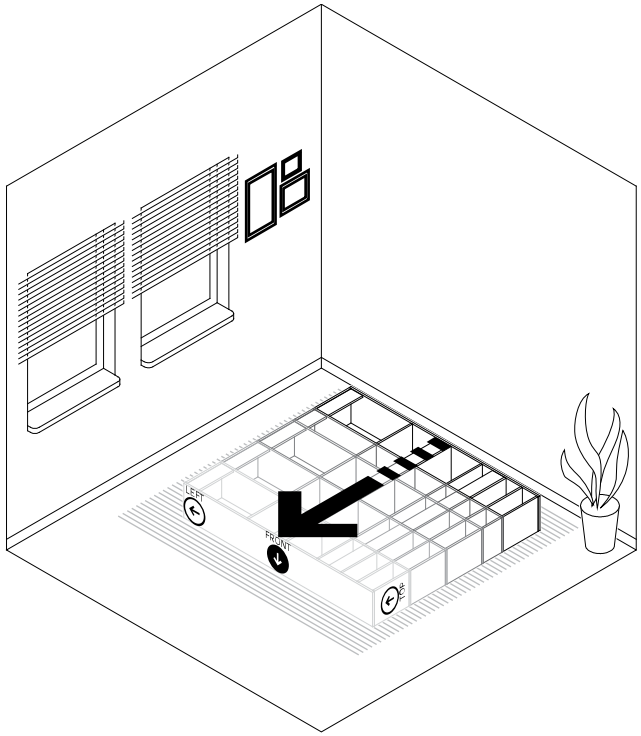

Assembling this shelf takes two.

Prepare the space.

The shelf has to be assembled on the floor right by the wall where it will stand. Secure the floor with cardboard, a rug or any other protective surface.

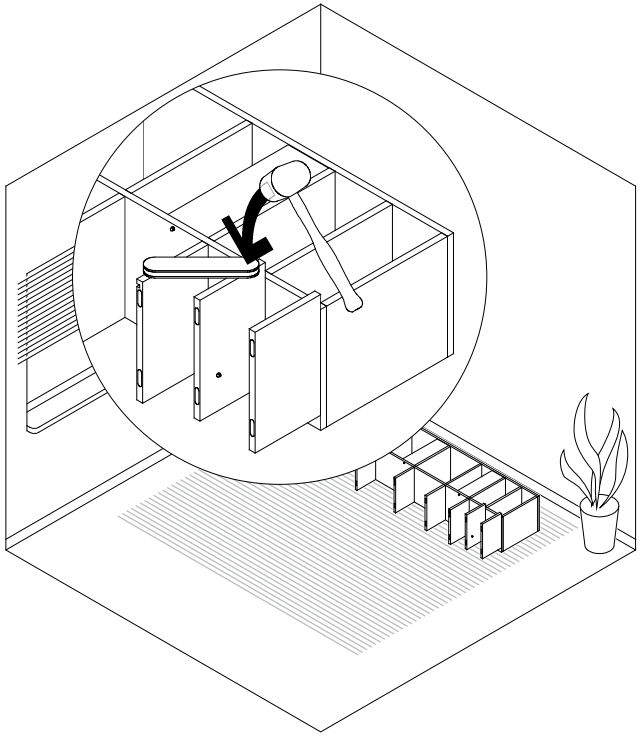

Start assembling.

The shelf has to be assembled face down, so please pay attention to the stickers that mark the front of each element. Start assembling from the lowest row. The distance from the base to the wall should roughly equal the depth of the shelf.

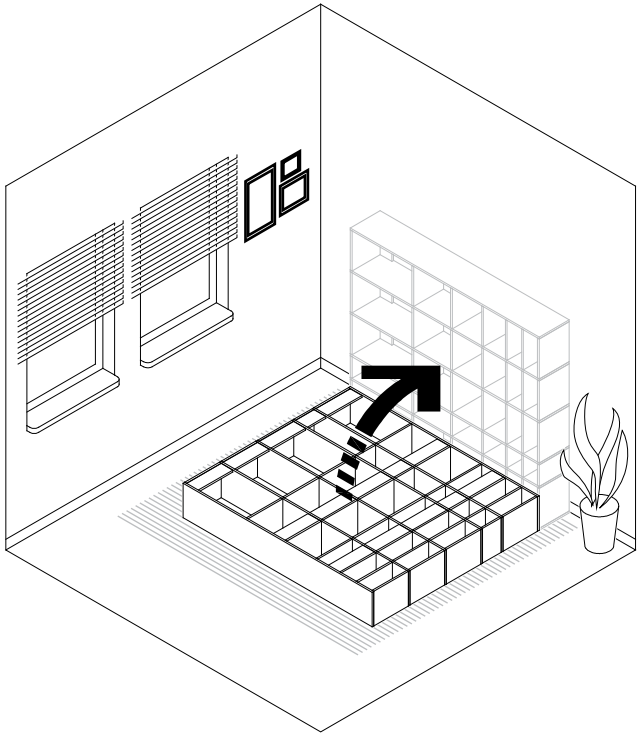

Assembly Tips - read before you start!

Slide parts into each other.

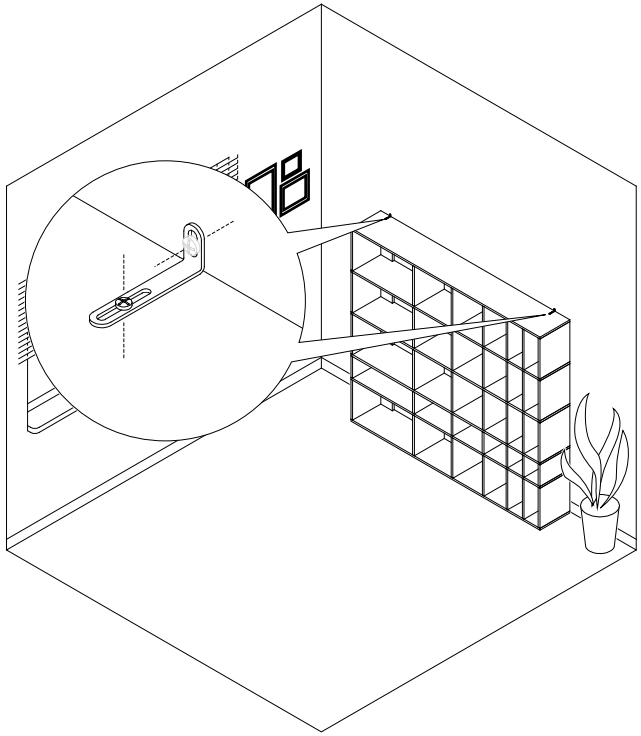

If it gets hard, use a hammer and ease the blow with the board provided.

Lift it up.

Once all parts are secured in place, raise the shelf from the floor.

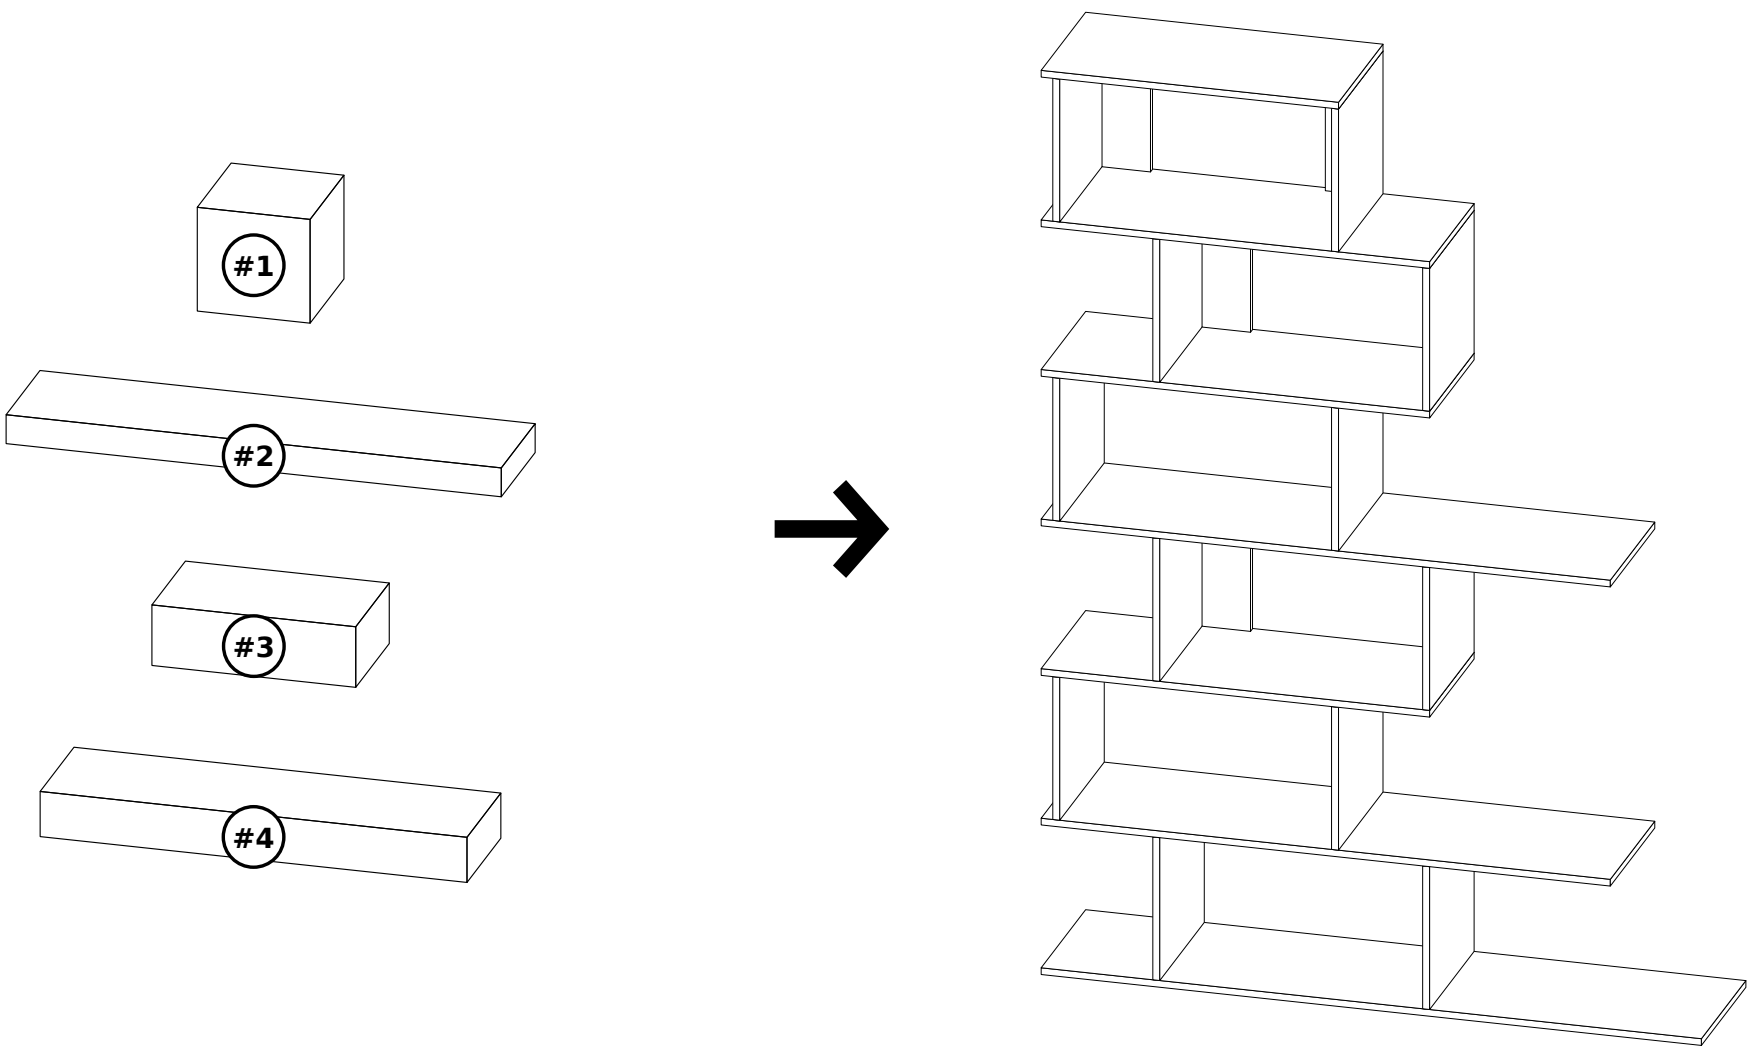

Fix it to the wall.

Use the provided wall fasteners. You'll also need a plug suitable for your walls that you can get at your local hardware dealer.

Your shelf must be fixed to a wall to prevent serious injury or damage that may result from tipping.

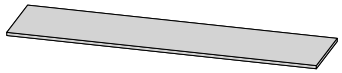

Part 1

Part 1 | 01

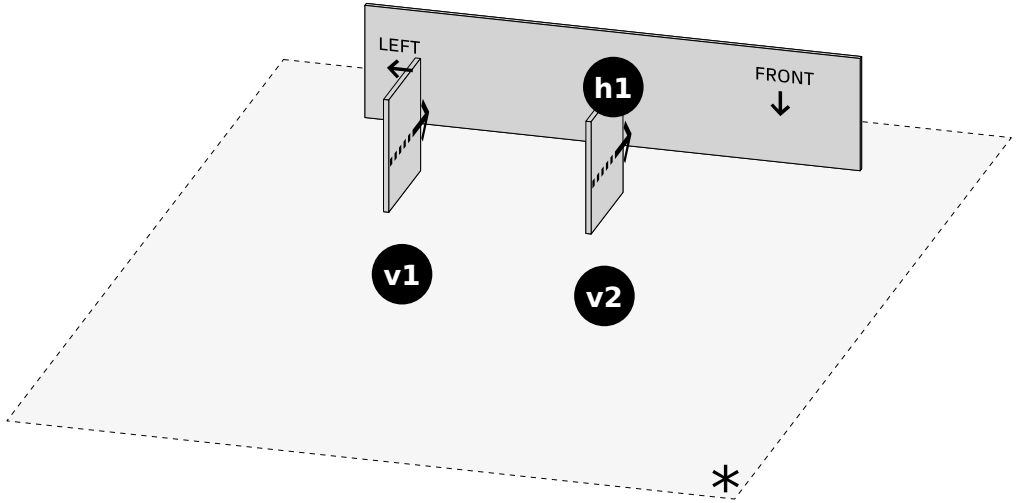

Tip: dont assemble your shelf directly on the floor!
Avoid scratches by placing the Tylko cardboard,
a protective mat or a rug underneath it.

Fixing The Shelf to The Wall

THE BOX IN THE PACKAGE #1

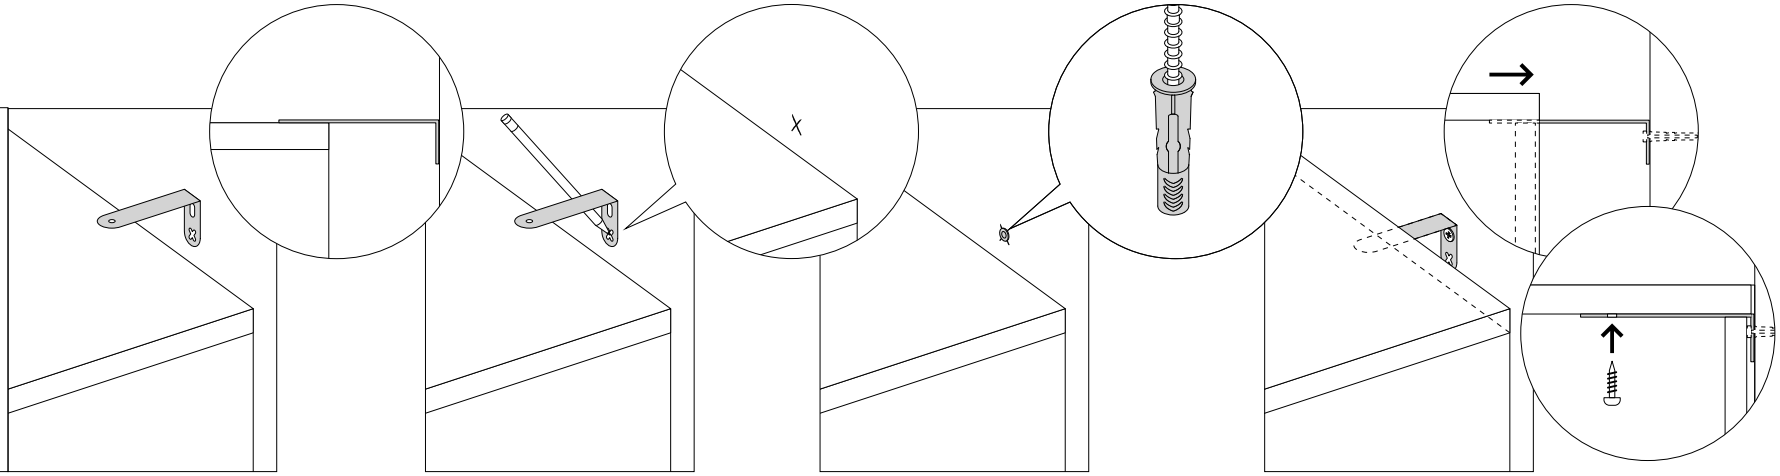

x 5

Securing your shelf to the wall will prevent serious injury or damage. Inside the package, you'll find the necessary hardware to safely attach your shelf to the wall to make it extra stable and prevent tipping. The included wall plugs are suitable for all wall types.

Your shelf must be fixed to a wall to prevent serious injury or damage that may result from tipping.

Congratulations!

Congratulations!

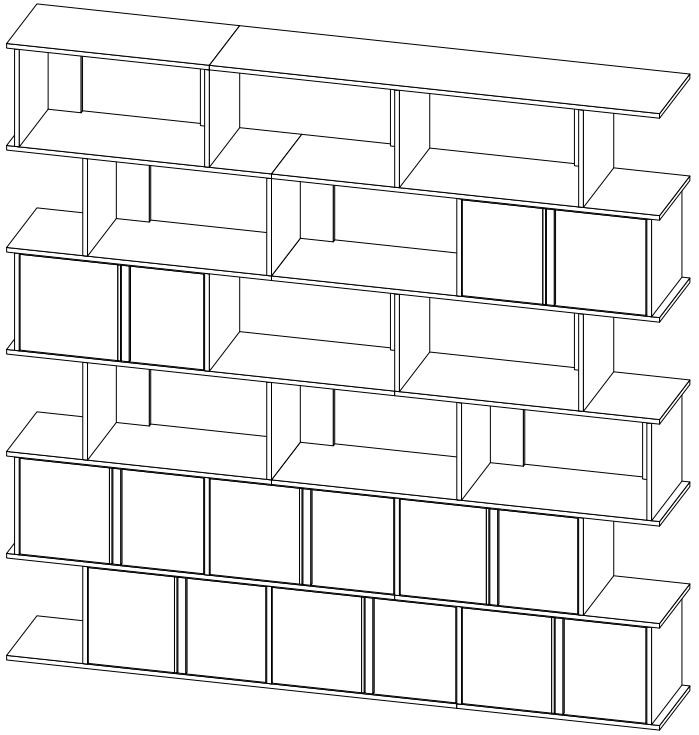

Well done, you did it! Not only have you designed your own beautiful Tylko Shelf but you've assembled it – and it looks great.

The next step is to spread the word. Snap a photo and share it on your social media or let us know what you think about Tylko and your shelf in a review at tylko.com.

hello@tylko.com

How to Take Care of Your Tylko Shelf:

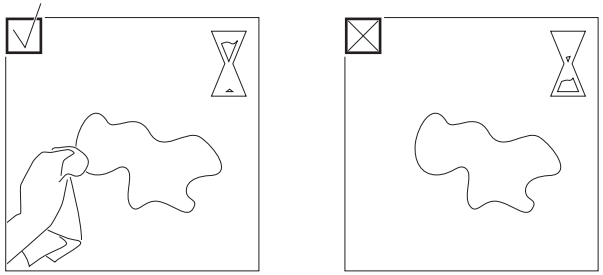

How to Take Care of Your Tylko Shelf:

We keep it simple at Tylko, and looking after your new shelf is pretty straight forward, too.

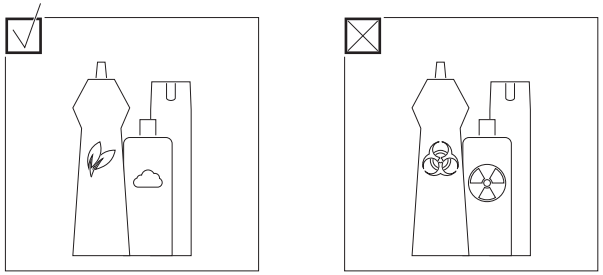

Dos and dont's:

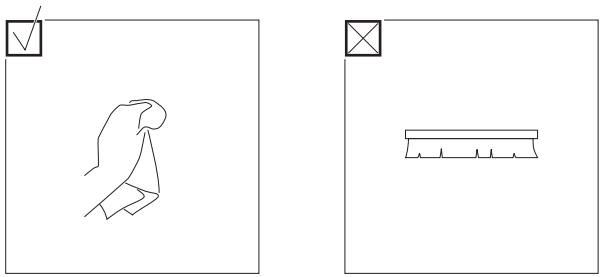

- Do protect your Tylko Shelf from excessive heat and open flame, and don't place it too close to heat sources such as radiators.

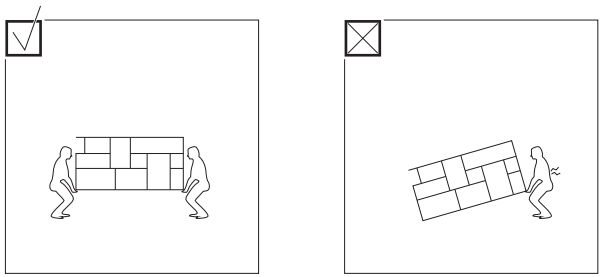

- Do wipe up any spills quickly, and don't let water stand on the shelf for too long.

- Do use gentle furniture cleaners – don't use strong chemicals.

- Do use a soft, moist cloth to clean it – don't use a hard scourer or brush.

- Do get a friend to help you move your Tylko shelf if it's too heavy or big for you – don't move large pieces by yourself. (Unless you like a sore back!)

Thanks for choosing Tylko!

We hope you've fallen in love with your Tylko Shelf. If you really enjoyed customizing your perfect-fit furniture, we have more beautiful pieces to match. Find them all on tylko.com, and stay tuned for some exciting new products coming soon!

All The Best,
The Tylko Team
